Rodrigo Ribes

Full Stack Developer

Linkedin/rodri-ribes **|** Github/rodri-ribes **|** Portfolio **|** rodri_ribes@hotmail.com

PROFILE

+3 years of experience as a Full Stack Developer, specialized in Front End. I like to create scalable projects, where creating intuitive and dynamic user experiences are my main focus. Always looking for innovation and excellence in each project.

EXPERIENCE

Ribes-Webs (Freelancer), 2022 - Now

- Documentation with the client.
- Comprehensive development of the application, ranging from conception to implementation.
- Implementation of customized solutions to meet specific client needs.
- Efficient coordination between teams to ensure successful delivery of projects.

EDUCATION

Atlántida University, 2020 – Currently
- Bachelor's Degree in Computer Science (Course Title)
- System Analyst (Intermediate degree)

Soyhenry.com (Bootcamp), 2022
- Full Stack Developer (Certificate)

TECHNOLOGIES

Programming languages: HTML, CSS, JavaScript, TypeScript, Java

Libraries: React JS, Node JS

Frameworks: SASS, Next JS, Redux JS, TanStack Query, Angular +v6, Express JS, Sequelize (ORM), Mongoose (ODM), Spring Boot

Database: MySQL, Postgre SQL, MongoDB

Applications: Git, Github, Jira, Firebase, Docker, Adobe Photoshop

PROJECTS

E-commerce (Dress)

Full Stack | 2023 – Now

- I developed a complete E-commerce that includes an administrator panel and configuration for users. I continue to improve it and add features, such as graphics, sales management, among others.
- Used various languages and technologies in development, such as HTML, JavaScript, React JS, SCSS, Node JS, Express and MongoDB.

Repository (Github) - Deploy

RibesCompress

Front End

- I developed an application that allows you to compress images and download them in .jpeg and .png formats.
- I used the following technologies: HTML, JavaScript, React JS and SCSS.

Repository (Github) - Deploy

KFC Template

Front End

- I designed a template for one of the fast food chains, specifically KFC.
- Used various languages and technologies, such as HTML, JavaScript, React JS and SCSS.

Repository (Github) - Deploy

Wiki-Games

Front End

- Developed a single page application (SPA) that allows viewing information about all published games, as well as detailed details about developers, platforms and stores. The application connects to the Rawg.io API to obtain the necessary data.
- Technologies used in development include JavaScript, React JS and Redux JS.
